

# The Armor of God

Paper  
Toy

## Ephesians 6:10-17

Finally, my brothers, be strong in the Lord, and in the power of His might. Put on the whole armor of God that you may be able to stand against the devil's evil tricks.

For we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places.

Wherefore put on the whole armor of God that you may be able to withstand in the evil day, and having done all, to stand. Stand therefore, with truth as a belt tight around your waist and having on the breastplate of righteousness; and as your shoes the readiness to announce the Good News of peace; Above all, taking the shield of faith, with which you shall be able to quench all the fiery darts of the wicked. And take the helmet of salvation, and the sword of the Spirit, which is the word of God.

*All Scriptures are paraphrased from the American King James Version.*

knight's head

knight's legs

Fold and glue the two sides of the sword together. Then cut out the sword by cutting along the lines of the sword.

base for Armor of God

helmet tuft  
fold and glue the two  
sides together, then  
cut along the lines

**TO ADD THE CREST TO THE HELMET**  
Cut out and assemble the helmet box and visor. Cut out the two parts of the tuft. Also, cut out the two tabs for attaching the tufts found on page 3. Glue the tufts and tabs sandwiched together with the tufts in the middle. Next, glue the assembled crest on top of the helmet. See the photos on the cover for the example.

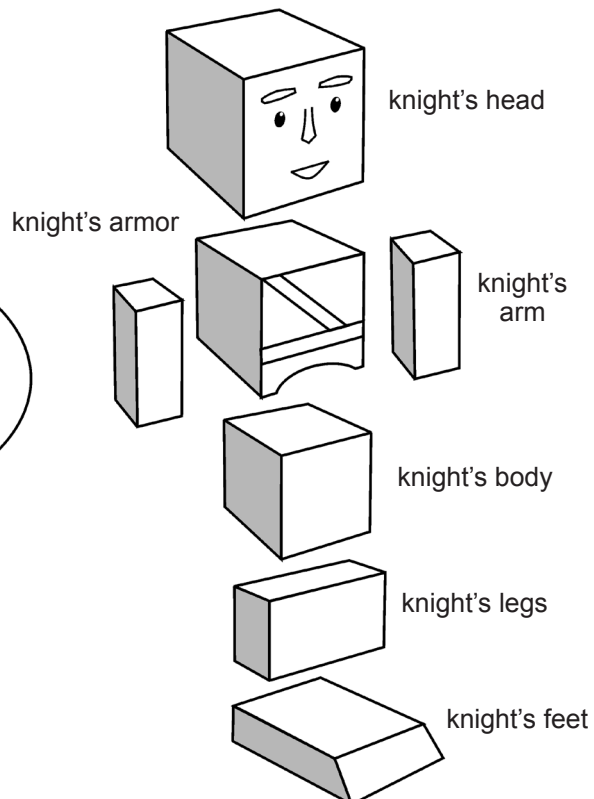

Extra tabs to use  
for the front of the  
base to write your  
own text.

the body

# Assembly Instructions

## TOOLS NEEDED

- Sharp scissors.
- Paper-cutting knife (recommended: X-Acto knife with a #11 blade).
- Sturdy tweezers with smooth edges. (Tweezers with rough edges or teeth will mar the surface of the pieces.)
- Metal ruler to make a straight cut or score.
- Toothpicks for reaching into tiny corners and spreading drops of glue.
- White glue and glue stick.
- Cutting surface (recommended: a cutting mat).
- Dry pen (no ink) or blunt knife for scoring.

## Cutting

Usually, a piece for a card stock model is cut out in two stages.

First, the piece is separated from the rest of the pieces by cutting roughly around it with scissors. Don't cut along the lines at this step.

Once the piece is separated, you can work on it without damaging other pieces. It's best to do the scoring and folding before proceeding to the fine cutting.

### Work on one piece at a time:

- Score along the dotted lines.
- Cut along the solid lines.
- Fold along the dotted lines, but don't add glue to any pieces yet.

**VERY IMPORTANT:** Try out the pieces to be glued before applying the glue. This will help you understand how the pieces fit together, and you will be able to take note of any adjustments that might be needed. Then apply a small amount of glue on the tab indicated by a black dot.

## Scoring

There are two kinds of folds:

**Mountain  
fold**

**Valley  
fold**

**Mountain fold** generally means that the texture is on the outside, while on a **valley fold** the texture is usually inside.

Score the fold lines to make a crisp straight fold. It's especially important for the smallest pieces to be scored before folding. To score, place a metal ruler along the fold line, and then press with a dull point (a dry pen or dull knife) along the fold line to compress the paper. This will help to achieve a crisp fold.

Most pieces on the model require a **mountain fold**, though a few use a **valley fold**. Valley folds will be indicated on the model pieces with the valley fold symbol.

- Be careful when using scissors or a paper cutting knife.
- Glue, scissors, and other tools may be dangerous, so be sure to keep them out of the reach of young children.

And remember,  
**there is no hurry.**  
**TAKE YOUR  
TIME!**
