

LITTLETOWN

The Train Station

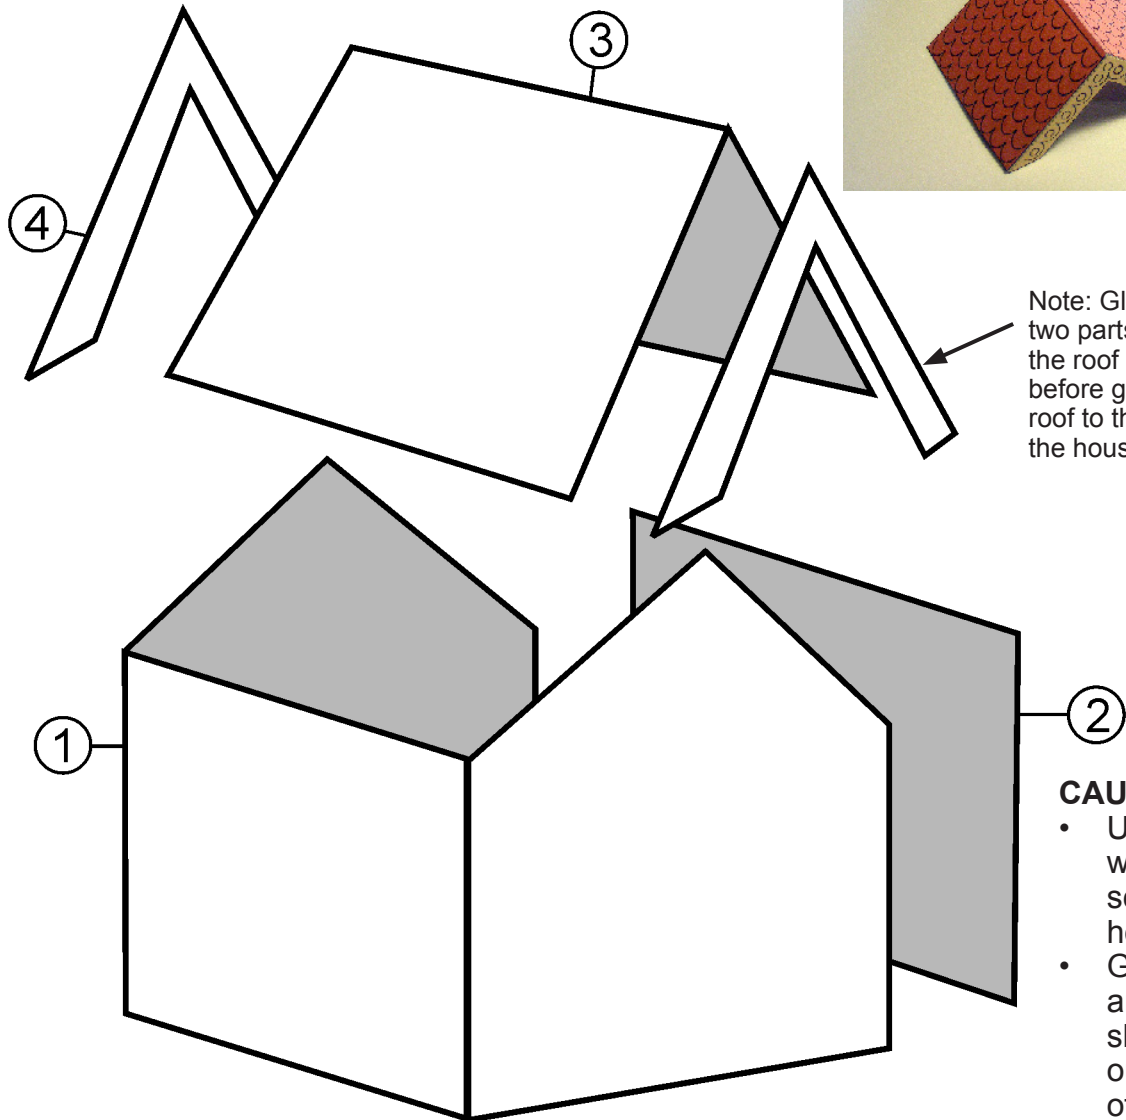

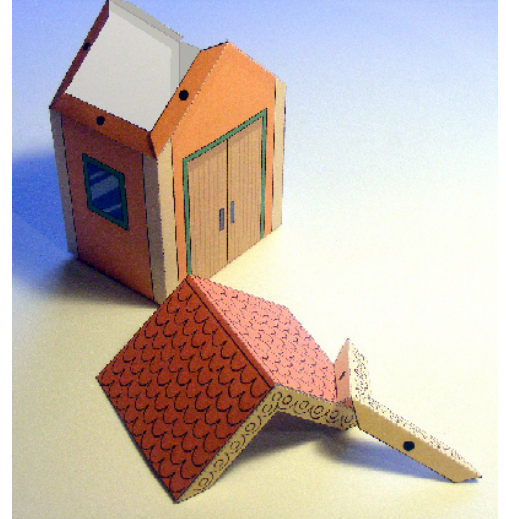

Instructions Booklet

LITTLETOWN

1 - Small Hangar

Assembly instructions

Tip: Always try out the pieces before gluing to check where they fit or if they need some adjustment.

Note: Glue these two parts first to the roof edges before gluing the roof to the top of the house.

CAUTION

- Use caution when using scissors or a hobby knife.
- Glue, scissors, and other tools should be kept out of the reach of younger children.

LITTLETOWN

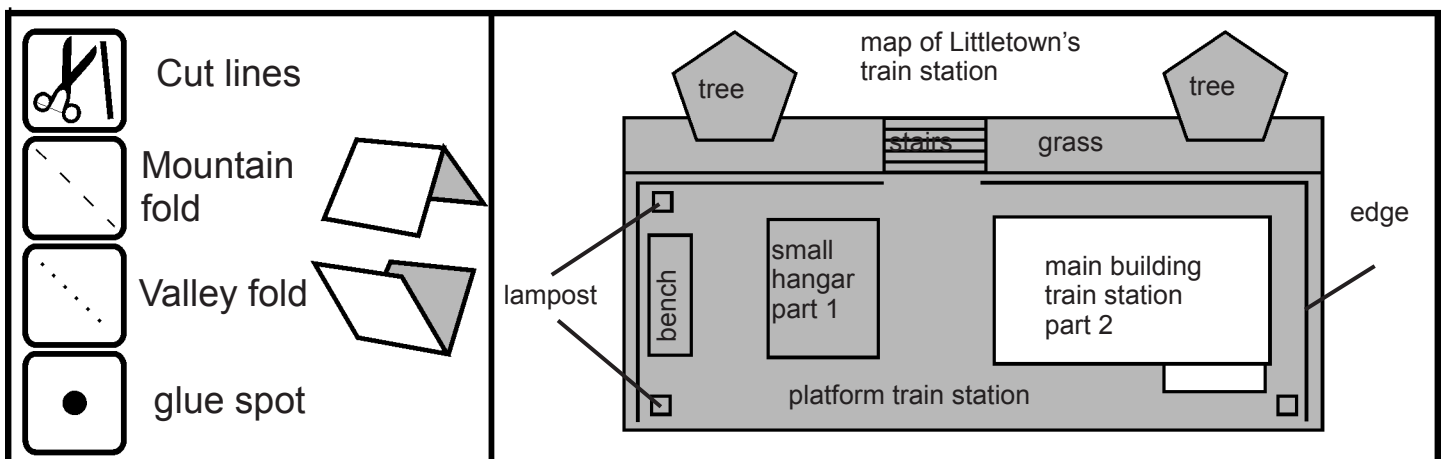

2 - Train Station Building

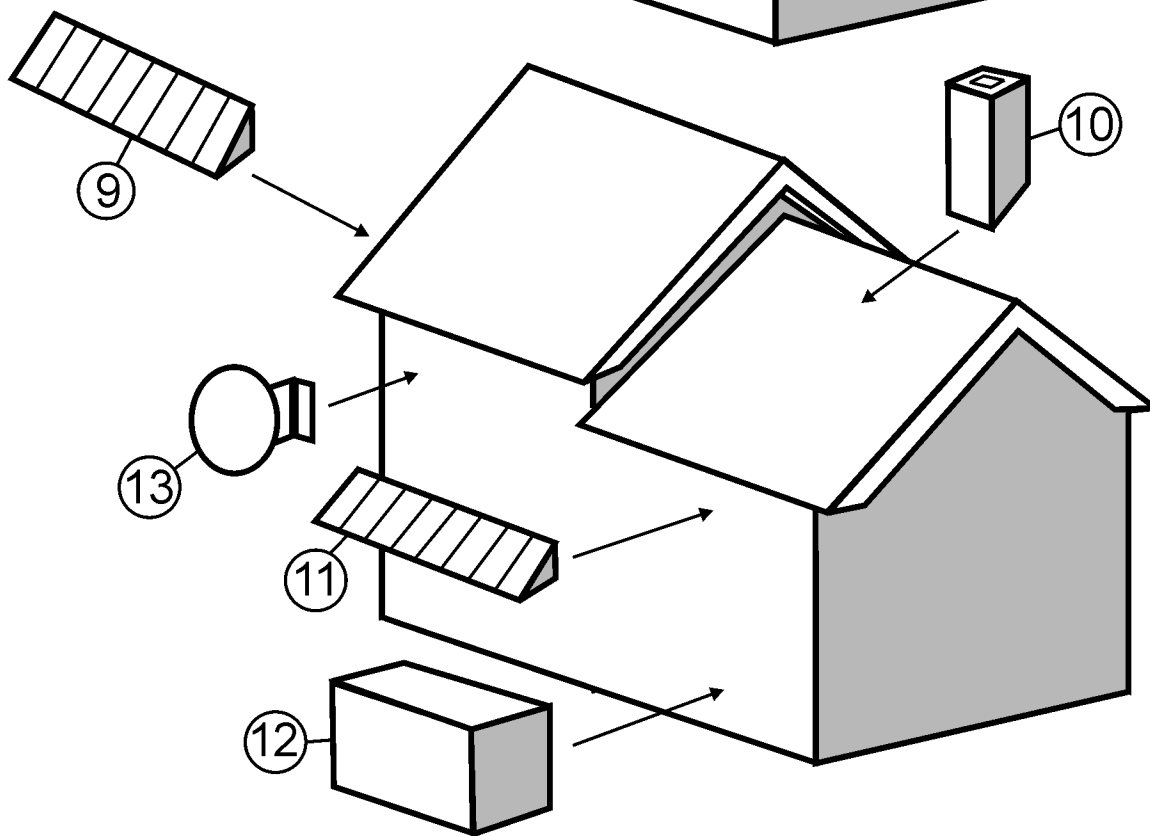

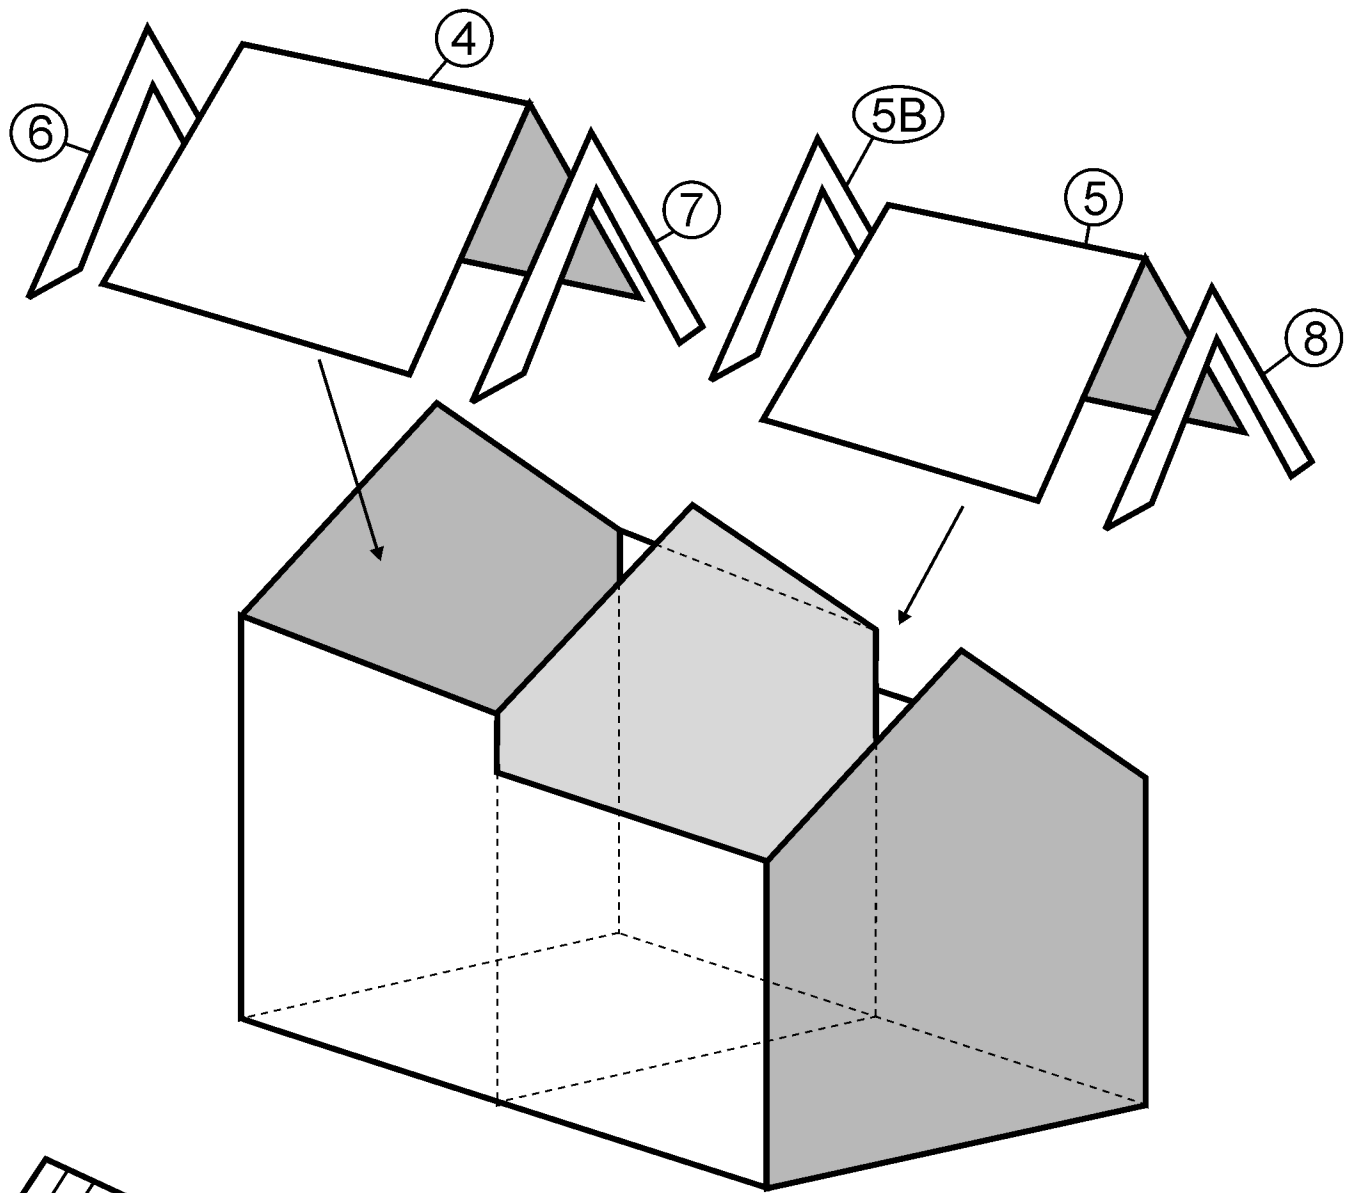

Assembly instructions

This building has a few complex parts to assemble, so take your time and don't worry if it doesn't turn out perfectly. Your work will improve as you gain experience. Have fun and enjoy building your model.

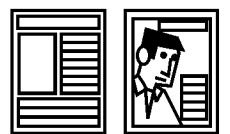

Note: First glue part 3 to part 1, then glue on part 2. (See photo.)

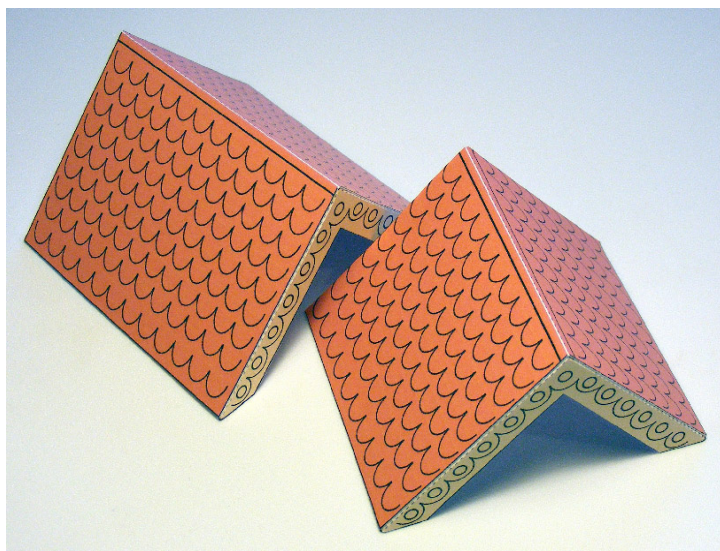

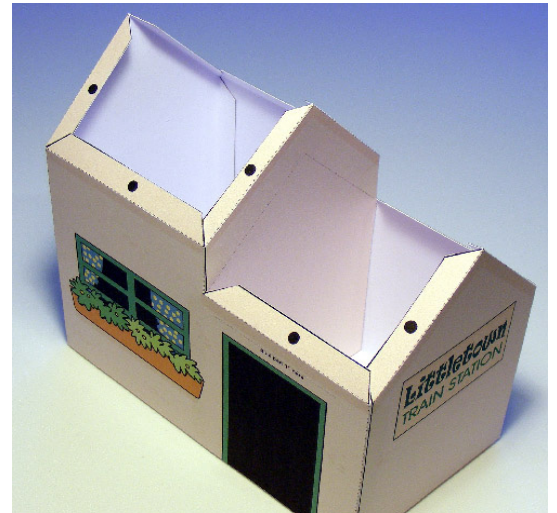

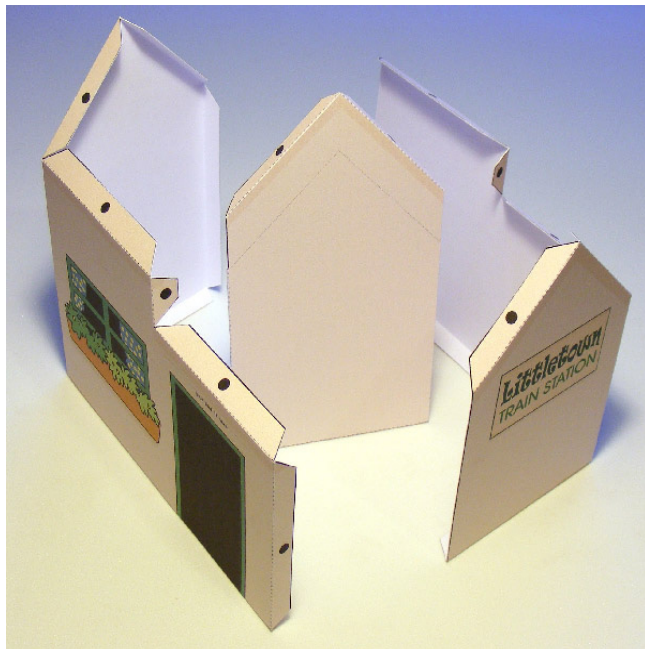

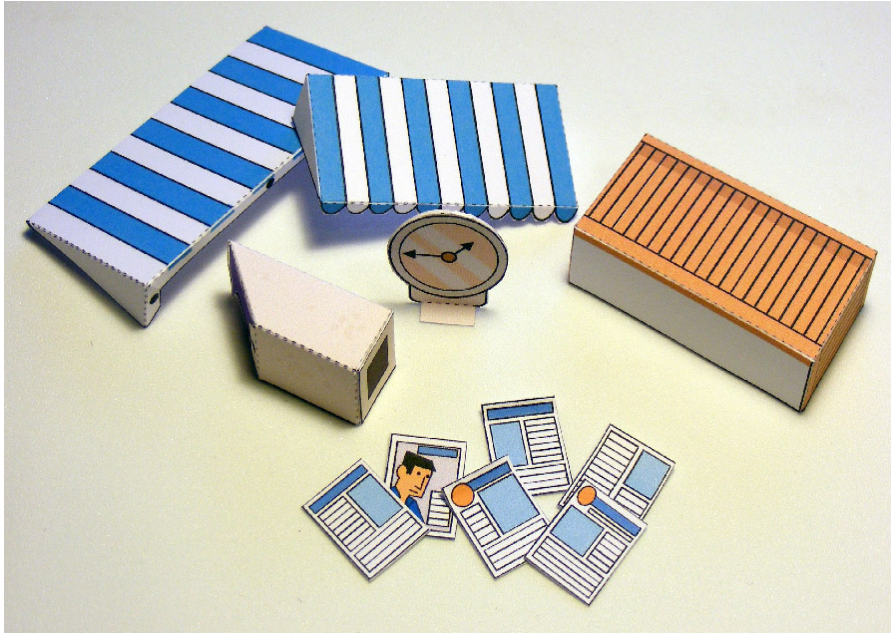

newspaper pages (See photo for a suggestion of where to glue.)

More Assembly Tips

- Write the number of each part on the back before cutting it out. This ensures keeping track of parts even after cutting them out. This is especially helpful in the case of small parts.
- Take your time to cut each piece out carefully.
- When gluing the 2 sides of a character or similar part, use glue stick instead of white glue to prevent the warping of the paper due to the large area to be glued.
- Always try out the parts to be glue before applying the glue. This helps in understanding how the parts fit together, and to notice if any adjustments are needed.
- And remember, there is no hurry, take your time, and don't feel shy about asking another for help if a piece is difficult to assemble. Experience will come with practice and soon you will be capable of assembling complex models.

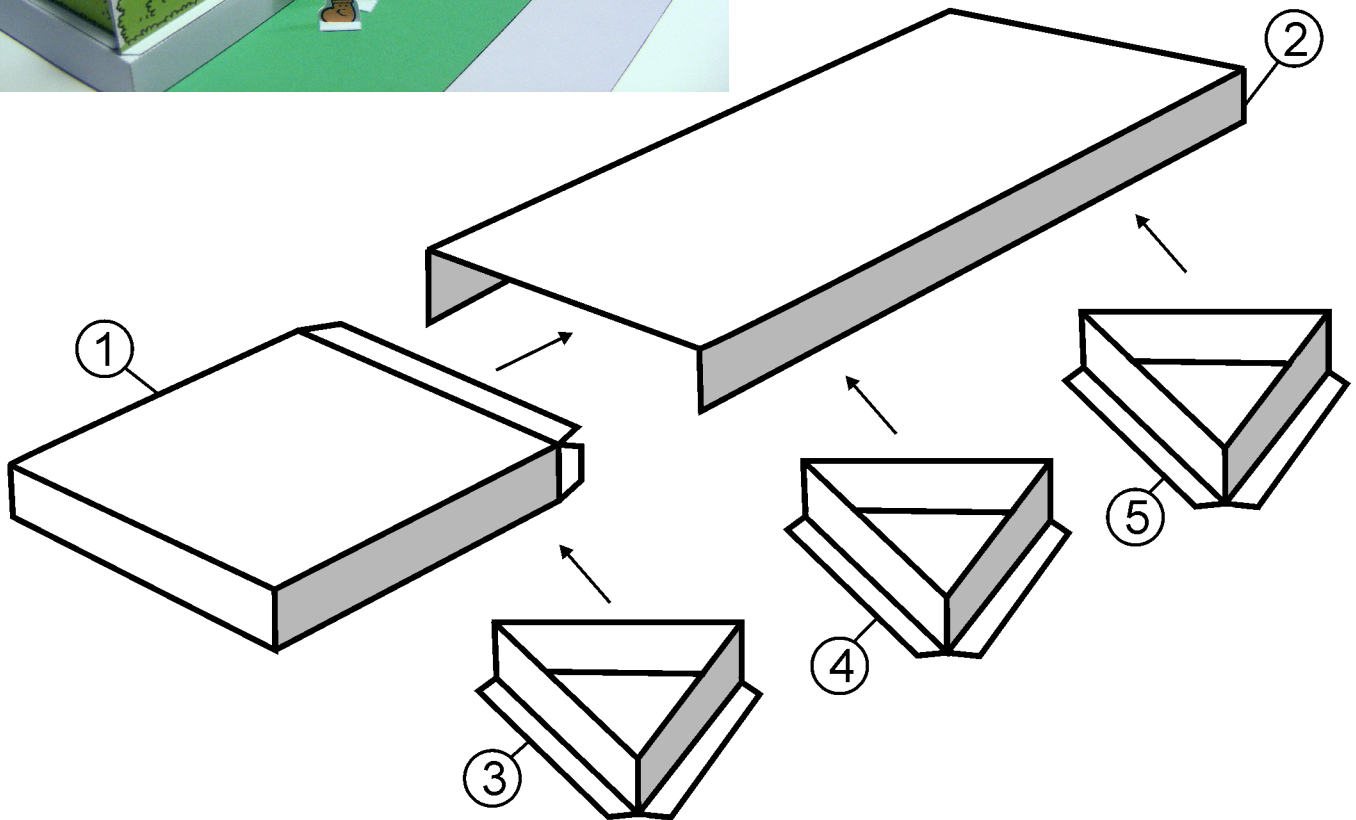

LITTLETOWN

3 - Train Station Platform and Accessoires

Assembly instructions

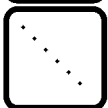

This model has a few complex parts to assemble, so take your time and don't worry if it doesn't turn out perfectly. Your work will improve as you gain experience. Have fun and enjoy building your model.

map of Littletown's train station

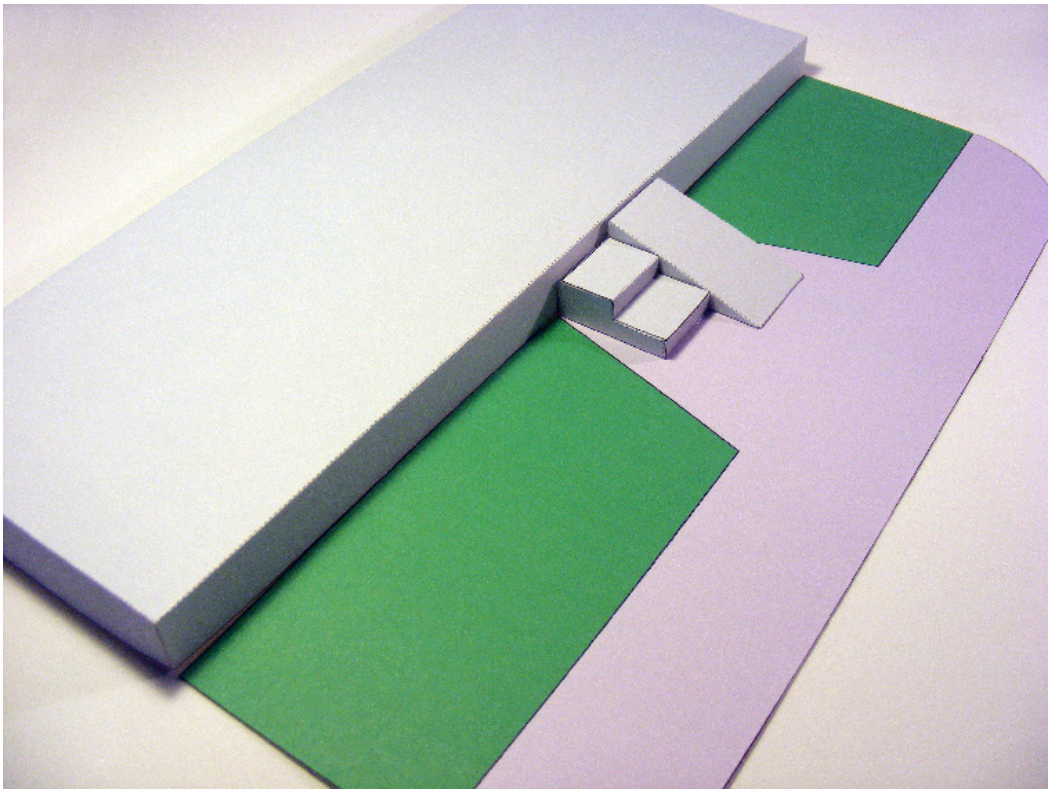

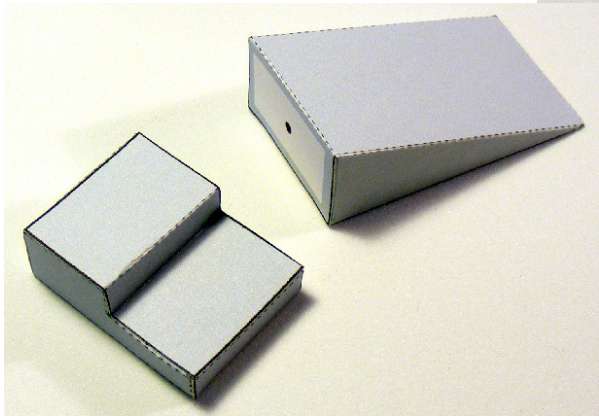

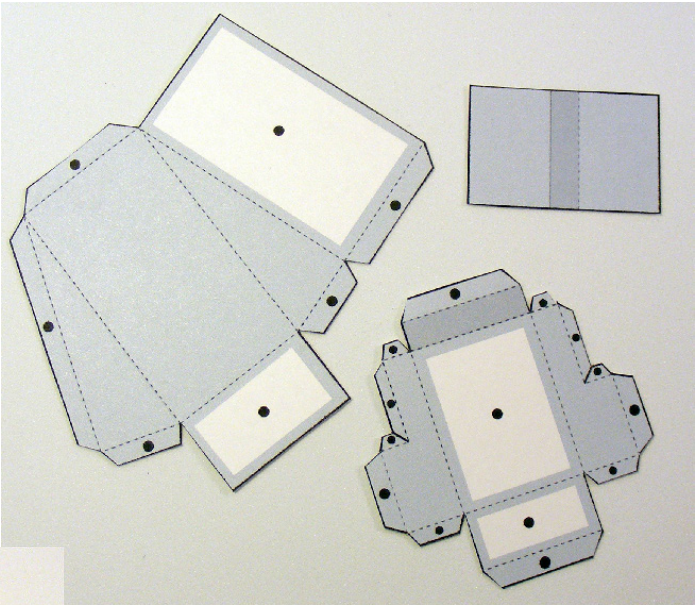

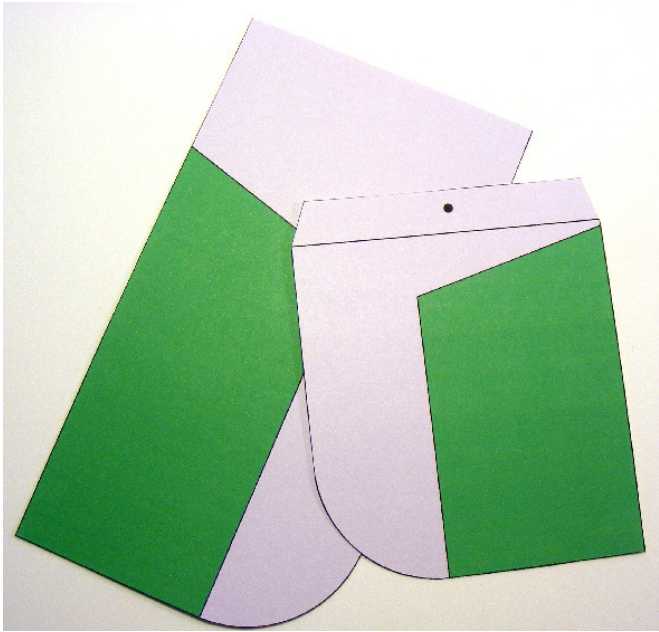

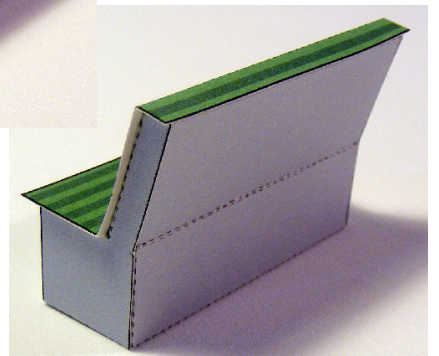

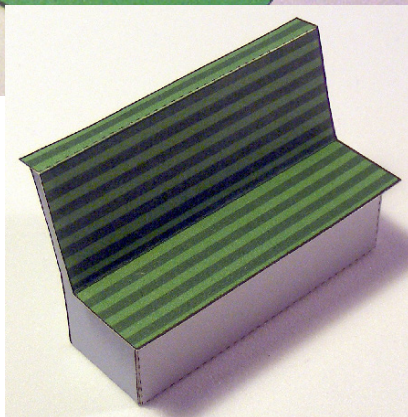

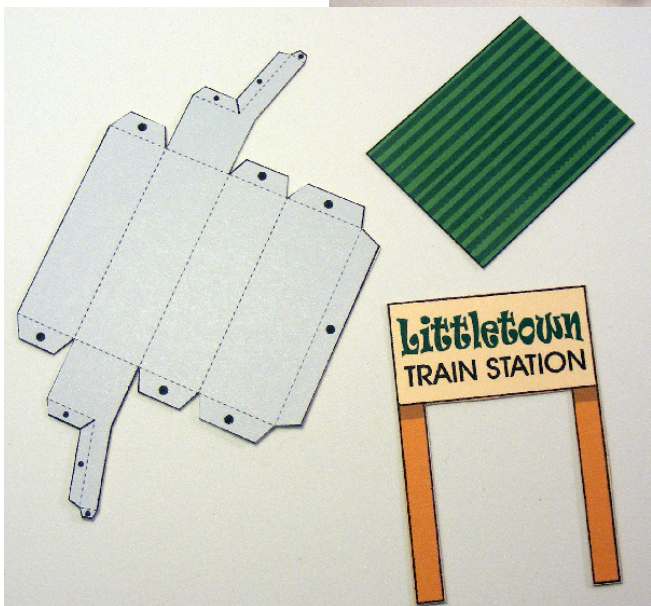

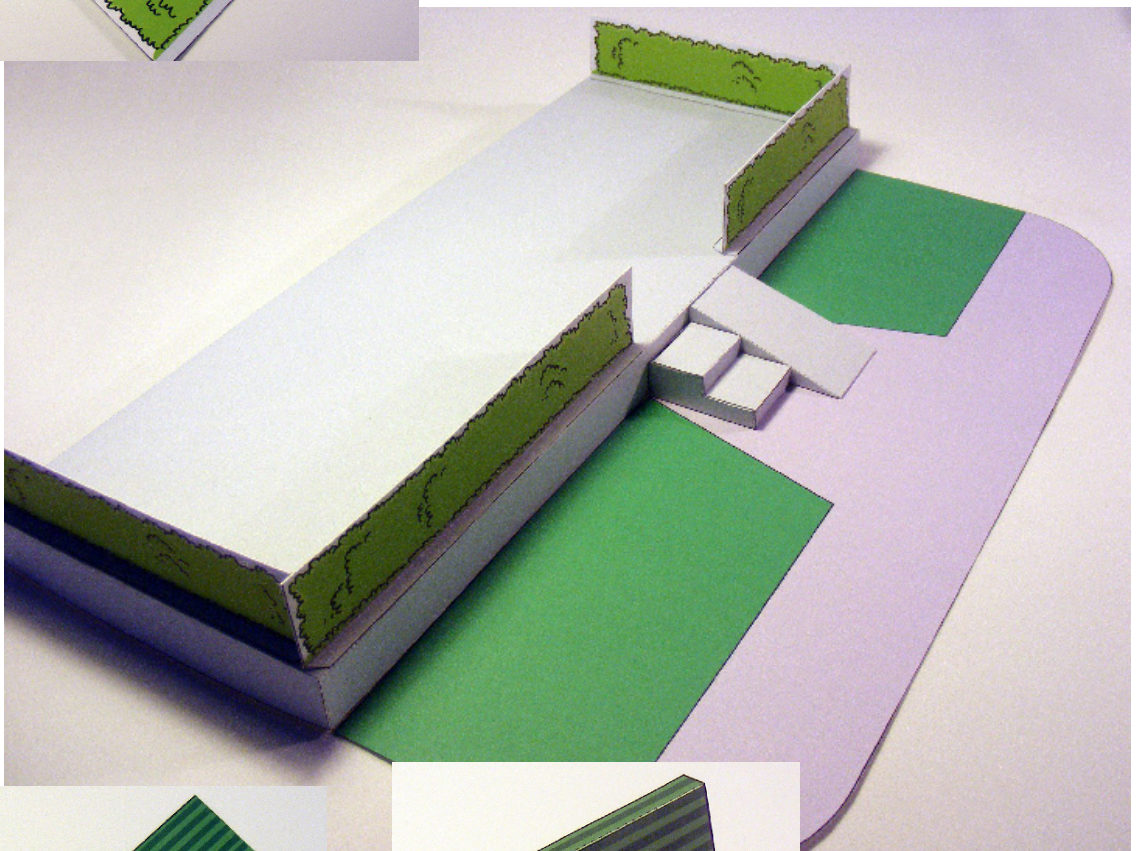

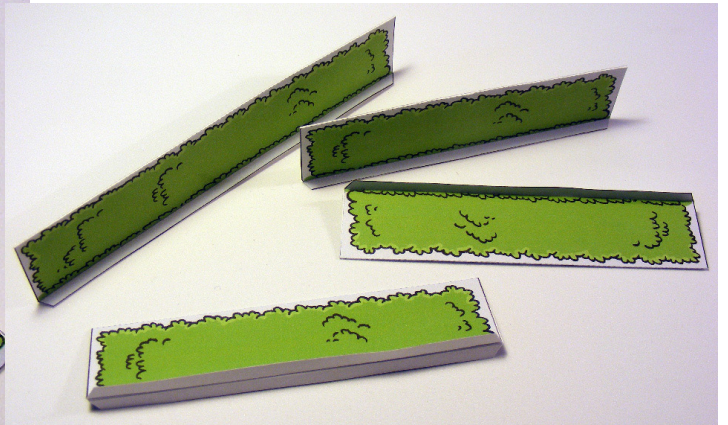

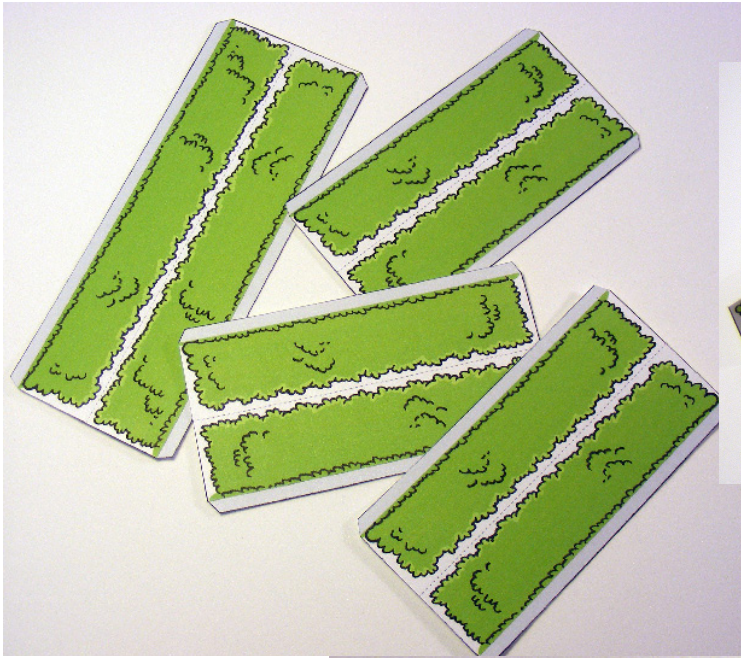

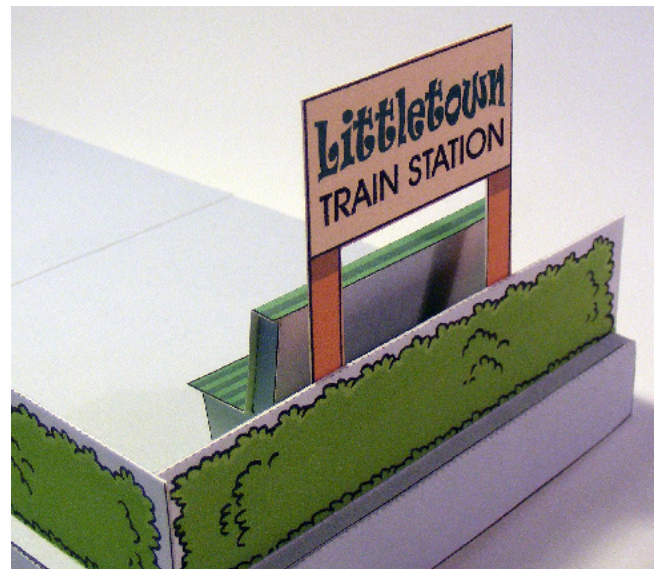

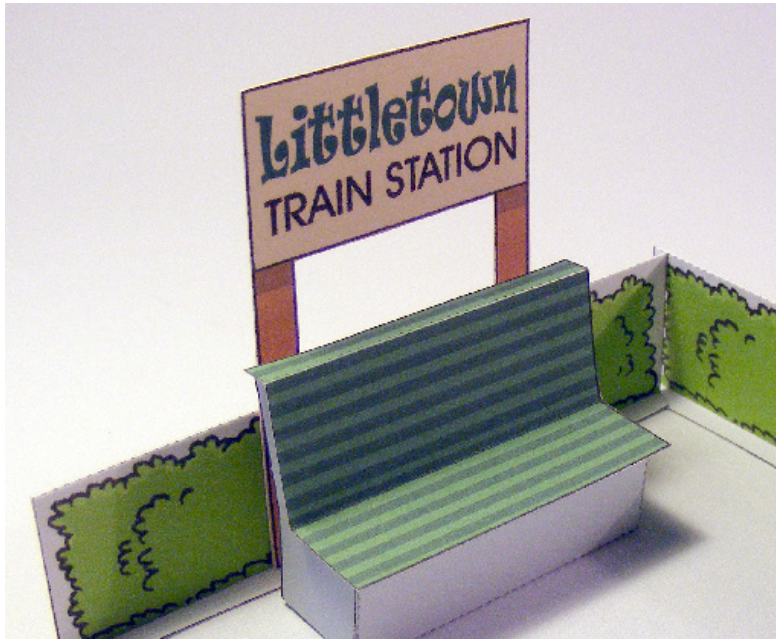

Form three triangles and glue them under the platform to add extra strength to support the two buildings of the train station.

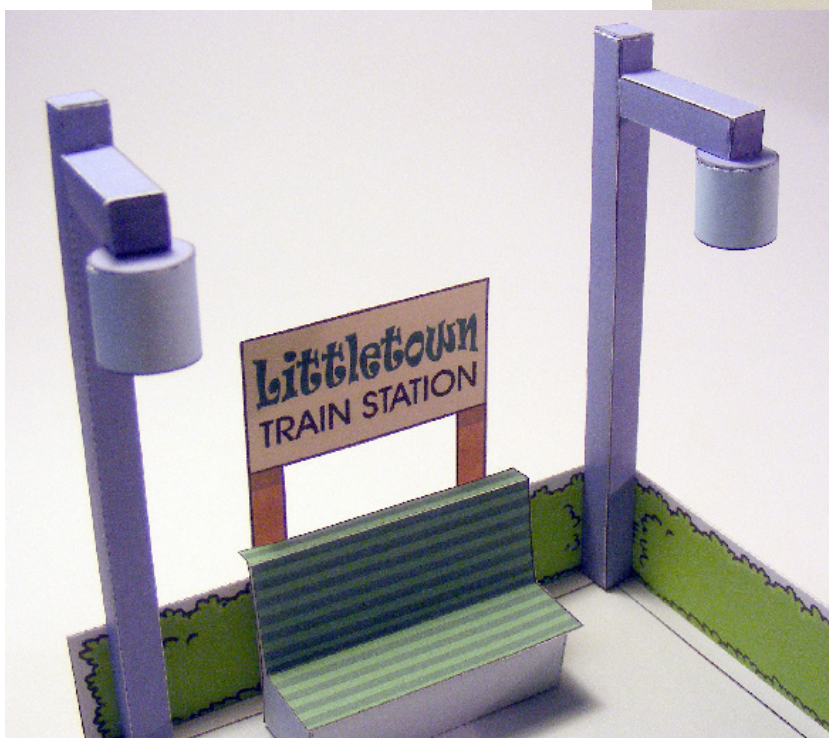

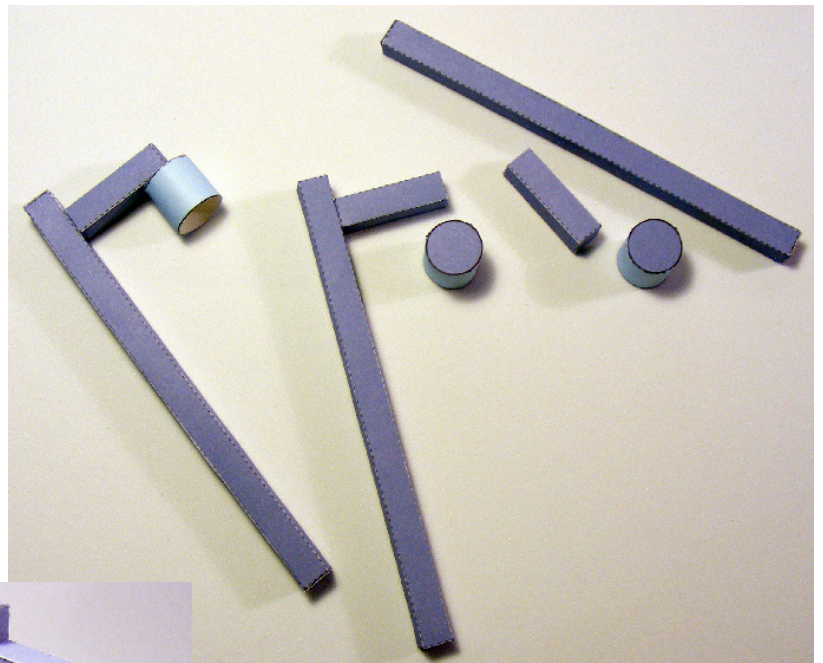

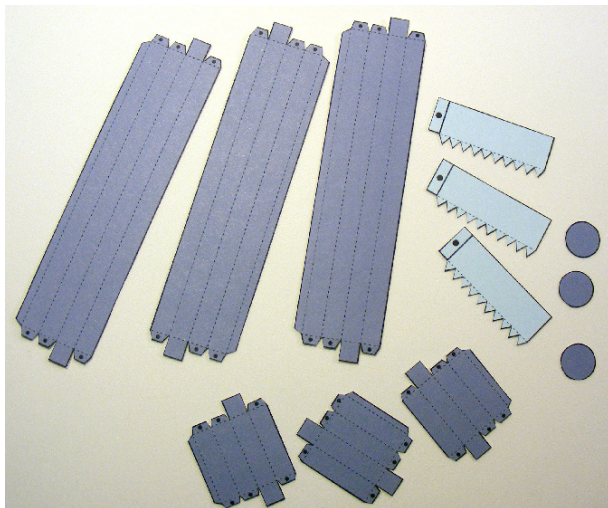

Glue the sign against the edge

Glue the lampposts on the floor of the platform and up against the edges to add extra strength.
